PROFILE

Detail-oriented BCA student with a strong foundation in HTML, CSS, JavaScript, and React. Seeking a Frontend Developer role to build responsive, user-friendly websites and grow my skills in modern web development.

ACADEMIC PROJECTS

MovieVerse

- Developed a responsive movie discovery web app using React.js that fetches real-time movie data from the TMDb API.
- Implemented a Watchlist feature using LocalStorage to store and persist user-selected movies across sessions.
- Added genre-based filtering and sorting by rating and popularity to enhance the user browsing experience.
- Created a dynamic UI that updates in real-time when movies are added or removed from the watchlist.
- Optimized API integration and state management for smooth rendering and fast performance on all devices.

Food Delivery App

- Built a responsive food delivery web app using React.js, HTML, CSS, and JavaScript.
- Implemented features like menu display, add-to-cart, sign feature, and delivery information, improving UI usability by 60%.
- Used Context API for state management and ensured 95% mobile responsiveness.
- Designed clean and user-friendly UI with CSS3, reducing page load by 35%.

Personal Portfolio

- Designed and developed a personal portfolio website using HTML, CSS, and JavaScript.
- Showcased hero, projects, education, about, skills, and contact section, improving recruiter accessibility by 80%.
- Implemented responsive design with Tailwind CSS, achieving 95% mobile compatibility.
- Integrated smooth animations with GSAP, enhancing overall user experience and engagement.
